

## Igor Pro 6.2-Compatible Color Tables

Igor Pro 6.2 added 2 new color tables:

Color Table Name	Colors	Notes
Mud	256	Dark brown to white, without the pink cast of the Mocha color table. For Veeco atomic force microscopes.
Classification	25	5 hues for classification, 5 saturations for variations within each class.

## Igor Pro 9-Compatible Color Tables

Igor Pro 9 added one new color table:

Color Table Name	Colors	Notes
Turbo	256	A reversed Rainbow-like color table with smoother transitions to avoid overly emphasizing features only because they map to a certain color. Designed by Anton Mikhailov, Senior Software Engineer, Daydream. See <a href="https://ai.googleblog.com/2019/08/turbo-improved-rainbow-colormap-for.html">https://ai.googleblog.com/2019/08/turbo-improved-rainbow-colormap-for.html</a>

## Color Table Waves

You can use color index waves (see **Indexed Color Details** on page II-400) as if they were color tables.
