

Chapter IV-8 — Debugging

Double-clicking a WAVE element (such as top.wv) will send it to the Wave Inspector (either a table or graph depending on what is checked in the Inspector popup):

Double-clicking a String element or char array (such as top.short) will send it to the String Inspector:

The Current Data Folder

The "Current DF" displays the path to the current data folder. You can select and copy the data folder path. See **Data Folders** on page II-107 for more information about data folders.
